About the Lecturer

Aleksandra Mileva, PhD

Full Professor

Faculty of Computer Science,
Goce Delcev University in Stip
Republic of N. Macedonia

Mail: aleksandra.mileva@ugd.edu.mk

What is Network Programming?

- “Network programming is writing programs or processes that can communicate with other programs or processes across a network.”

Aim and Learning Outcomes

- The **aim** is to introduce network programming concepts by using different tools and techniques provided in Java SDKs (Standard edition)
 - We will learn it in combination with concurrent programming.
- After completion of the course, students should be able to
 - know and understand the key concepts of network programming;
 - program concurrent threads and servers in Java;
 - develop client/server applications using part of the Java networking APIs and key concepts of network programming.
