New Java Project

Create a Java Project

Create a Java project in the workspace or in an external location.

Project name:

FirstProject

☒ Use default location

Location: C:\WPartition\Eclipse-workspace\FirstProject

Browse...

JRE

☒ Use an execution environment JRE: JavaSE-1.8

☐ Use a project specific JRE: jre

☐ Use default JRE 'jre' and workspace compiler preferences

[Configure JREs...](#)

Project layout

☐ Use project folder as root for sources and class files

☒ Create separate folders for sources and class files

[Configure default...](#)

Working sets

☐ Add project to working sets

New...

Working sets:

Select...

Module

☐ Create module-info.java file

Module name:

☒ Generate comments

The default compiler compliance level for the current workspace is 17. The new project will use a project specific compiler
